

# Cosmopak

Cosmopak is a product design, development and manufacturing company servicing the cosmetics industry. Its focus is to develop innovative cosmetic items. The company is best known as a pioneer in flow thru brush pens, however its product range and services are more diverse. Cosmopak offers full design services—from concept and brand development to finished artwork. Cosmopak has now expanded the jars and tubes range, and offers a new category of products: airless dispensers. Its Web site has been updated for 2009, and features Cosmopak's library of more than 700 stock products. The site includes a search function to allow clients to quickly and easily navigate the product range. Cosmopak's commitment to service ensure any pricing or samples will be dispatched within 24 hours.

## New Products in 2009

### Semi-permanent Felt Tipped Liner Pens

We are re-introducing an old favorite of ours—felt liner pens for lips and eyes. Cosmopak launched the original Lip Rouge pen in 1998; now feels it's time to bring it back!

The 2008 range includes a wide selection of 66 shades in four categories:

- Lip liner
- Eye Liner
- Lip Filler
- Eyebrow Liner

All the water-based formulas are EU/FDA and Japan approved. The company's semi-permanent formula lasts up to 48 hours.

### Post Consumer Recycled Lipstick Case

#### ENVIRONMENTAL

Made of 100% postconsumer recycled plastic, this lipstick case is truly "green." Recycled material is a PP/PE combination sourced and manufactured in Europe. During the recycling process of PET beverage bottles, the caps are shredded, hot washed and dried, then used as base material for moulding.

#### QUALITY

High quality moulding helps ensure consistent quality and color. All available decoration options can be used—including silkscreen, hot stamping and engraving.

"Cosmopak believe that they have made a big leap forward with the first PCR case available worldwide. Plastic is not biodegradable; it is, therefore, important to invest in innovative ways of recycling current material."

#### PROPEL/REPEL TWIST

Cosmopak is pleased to introduce the propel/repel PP/ PCTA flow through pen with twist activator. Its latest pen innovation features a transparent applicator that allows the formula to show through. Available in a variety of finishes with a chisel multi-hole applicator, this item is ideal for lip glosses.
