

## NAIL PEN FLOW THRU

Cosmopak, the Leader in Flow thru cosmetic pens, has developed a range of precision Nail pens for quick and easy application. The range consists of 4ml and 2ml sizes which operate by a clicking piston system that ensures a consistent and maximum flow of nail polish. Application is with a flat brush, only this one requires no dipping into the bottle eliminating the risk of spillage! Simply click and apply. An additional feature is a two part cap that stops drying on the brush. All the parts are made of Borex and are compatible with nail formulations.
